AWS ACCREDITED AUDITOR AND SPECIALIST TRAINING PROGRAM

For auditors and specialist service providers

This one-day course is accredited and recognised by AWS and satisfies the structured training and examination requirements for professionals seeking Level 3 accreditation as an AWS accredited auditor, consultant or trainer. The course examines the value proposition for water stewardship compliance, the business case for water stewardship and the requirements of the AWS verification process.

The course includes seminars, exercises, audit case studies and presentations and concludes with a written exam. The course is conducted in English. Full competence in English, written and spoken is an essential requirement.

COST: £395 + vat (non-residential)

DATE: 30th October 2017 @ Edinburgh Training & Conference Venue, EH1 1SU.

LEARNING OBJECTIVES

The AWS Specialist Training Program will

- Equip Auditors and specialist service providers with a deeper knowledge of the requirements and application of the water stewardship system to water using sites
- Provide potential auditors specialist service providers with an understanding of the AWS verification system and its requirements
- Provide potential auditors specialist service providers with an understanding of the AWS accreditation program and its requirements
- Support specialist service providers in developing a business case to market their services to business and organisations likely to engage with water stewardship.

WHO SHOULD ATTEND?

- Those seeking accreditation as an AWS auditor, consultant or trainer
- Those who will be implementing and managing an AWS system within a multiple site organisation

PRE-REQUISITES

- Participants **MUST** have completed both the 'Foundations of Water Stewardship' and the 'Advanced Training in the AWS Standard' programs before undertaking this course.
