Stakeholders are invited to submit written submissions to the Lead Auditors by 12th November 2020.

The AWS standard looks to engage water-using sites in understanding and addressing shared catchment water challenges as well as site water risks and opportunities. It asks water-using sites to address these challenges in a way that progressively moves them to best practice in terms of five outcomes:

**GOOD WATER
GOVERNANCE**

**SUSTAINABLE
WATER
BALANCE**

**GOOD WATER
QUALITY
STATUS**

**IMPORTANT
WATER-RELATED
AREAS**

**SAFE WATER,
SANITATION
AND HYGIENE
FOR ALL (WASH)**

Please note that oral and written submissions made in reference to the client's operation should be supported by objective evidence wherever possible.

Stakeholders who wish to submit written comments to the audit team are requested to contact the Lead auditor directly using the contact information provided above.
